7800 Series
Burner Control

7800 SERIES
The latest in Flame Safeguard state-of-the-art technology is the 7800 SERIES Burner Control. The Honeywell 17800 SERIES combines safety, comprehensive diagnostics, communication and networking capabilities into one compact and affordable microcomputer burner control. It can do just about anything and everything you would like it to do.

The 7800 SERIES works on a wide range of industrial applications: burners, boilers, furnaces, ovens, kilns, process heaters and more. The 7800 SERIES replaces more than 400 Honeywell and competitive control types. It offers you intelligent control anyway you want it: with or without communications, with or without an expanded annunciator, with or without a keyboard display module. Whatever features you want from a burner control, just ask. With the 7800 SERIES, the answer is...yes, it can.

COMMUNICATIONS INTERFACE
The 7800 SERIES can interface with compatible IBM® equivalent personal computers at an onsite or remote location through a communications interface.
NOTE: CONTROLS FOR USE IN 7800 SERIES BURNER CONTROL SYSTEMS ARE AVAILABLE ONLY THROUGH AUTHORIZED HONEYWELL 7800 SERIES DISTRIBUTORS.

For the name of your nearest authorized Honeywell 7800 SERIES Distributor, please call 1-800-345-6770, ext. 2040.

RM7890A,B,C,D/EC7890A,B Primary Controls

Microprocessor-based integrated primary burner control for automatically fired gas, oil, coal or combination fuel single burner applications.

- Dependable, long-term operation provided by microcomputer technology.
- Five LEDs for sequence information.
- Nonvolatile memory retains history files and sequence status after loss of power.
- Optional remote reset.
- Provides application flexibility and optional communication interface capability.
- Safety features include closed loop logic test, expanded safe-start check, internal hardware status monitoring and tamper-resistant timing and logic. Dynamic Self-Check and Dynamic AMPLI-CHECK™ safety features available.
- Selectable recycle or lockout on loss of flame.
- Shutter drive output (RM7890B) for use with Dynamic Self-Check flame detectors.
- Works with existing flame detectors.

APPROVAL BODIES: RM7890
Underwriters Laboratories Inc. listed, File No. MP268, Guide No. MCCZ.
Canadian Standards Association certified, LR9S329-3.
Factory Mutual approved.
IRI acceptable.

DIMENSIONS: 5 in. [127 mm] wide, 5 in. [127 mm] high, 3-1/32 in. [77 mm] deep.

- WEIGHT: 1 lb., 13 oz.
- OPERATING AMBIENT TEMPERATURE RANGE: – 40 F to +140 F [–40 C to +60 C].
- ELECTRICAL RATINGS:
  Voltage and Frequency: 120 Vac (+10/ -15%), 50/60 Hz (±10%) RM7890A,B,C,D.
  220-240 Vac (+10/ -15%), 50/60 Hz (±10%) EC7890A,B.

REQUIRED COMPONENTS:
R7847, R7848, R7849, R7886A Flame Signal Amplifiers.
Q7800 Universal Wiring Subbase.

OPTIONAL COMPONENTS:
Communications (see Communications Section).
S7800A Keyboard Display Module.
S7810A DATA CONTROLBUS MODULE™.
S7820A Remote Reset Module.
S7830A First-out Expanded Annunciator Module.

REPLACEMENT PART 221729 Dust Cover.

Primary Relay Modules-Automatic

RM7895A,B,C,D,E, F/EC7895A,C Primary Controls

Microprocessor-based integrated primary burner control for automatically fired gas, oil, coal or combination fuel single burner applications.

- Dependable, long-term operation provided by microcomputer technology.
- Five LEDs for sequence information.
- Nonvolatile memory retains history files and sequence status after loss of power.
- Optional remote reset.
- Provide application flexibility and optional communication interface capability.
- RM7895C,D;EC7895C have delayed main valve.
- Safety features include airflow switch check, closed loop logic test, expanded safe-start check, internal hardware status monitoring and tamper-resistant timing and logic. Dynamic Self-Check and Dynamic AMPLI-CHECK™ safety feature available.
- Selectable lockout or recycle on flame failure.
- Selectable lockout or recycle on loss of airflow.
- Works with existing flame detectors.

Primary Relay Modules—Semi-Automatic

RM7885A/EC7885A Semi-Automatic Primary Control

Microprocessor-based integrated burner control for industrial semi-automatically fired, gas, oil, coal, or combination fuel single burner applications.

- Delays admission of fuel to combustion chamber until pilot flame has been proven.
- Dependable, long-term operation provided by microcomputer technology.
- Five LEDs for sequence information.
- Has nonvolatile memory; retains history files and sequencing status after loss of power.
- Optional remote reset.
- Provides application flexibility and optimal communications interface capability.
- Provides flame signal check during standby.
- Safety features include closed loop logic test, expanded safe-start check, internal hardware status monitoring and tamper-resistant timing and logic. Dynamic Self-Check and Dynamic AMPLI-CHECK™ safety features available.

Primary Relay Modules—Semi-Automatic

RM7838A Semi-Automatic Programmer

Microprocessor-based integrated burner control for industrial semi-automatically fired gas, oil, coal or combination fuel single burner applications.

- Delays admission of fuel to combustion chamber until pilot flame has been proven and then to monitor the flame through the run period while providing system status indication.
- Dependable, long-term operation provided by microcomputer technology.
- Programmed to provide level of safety, functional capability and features beyond the capacity of conventional controls.
- Functions include purge, burner pilot startup, flame supervision, system status indication, system or self diagnosis and troubleshooting.
- Intermittent pilot valve.
- Safety features include closed loop logic test, expanded safe-start check, internal hardware status monitoring, and tamper resistant timing and logic. Dynamic Self-Check and Dynamic AMPLI-CHECK™ safety features available.
- Provides application flexibility and optional communication interface capability.
- Selectable pilot flame establishing period.

APPROVAL BODIES:

OPERATING AMBIENT TEMPERATURE RANGE: – 40 F to +140 F (–40 C to +60 C).

ELECTRICAL RATINGS:
- Voltage and Frequency: 120 Vac (+10/-15%), 60 Hz (±10%) RM7800E, G, M
- 120 Vac (+10/-15%), 50/60 Hz (±10%) RM7800L

REQUIRED COMPONENTS:
- Q7800 Universal Wiring Subbase.
- R7847, R7848, R7849, R7886 Flame Signal Amplifiers.
- S7800 Keyboard Display Module.
- ST7800 Plug-in Purge Timer Card.

OPTIONAL COMPONENTS:
- Communications (see Communications section).
- S7810 DATA CONTROLBUS MODULE™
- S7820 Remote Reset Module.
- S7830 First-out Expanded Annunciator.

7800 SERIES Required Components

Q7800A,B 22-Terminal Universal Wiring Subbases

Universal burner, panel or Wall mount subbases for RM78xx and EC78xx SERIES relay modules and S7830A Expanded Annunciator.

- Makes electrical connections for 7800 SERIES relay modules or S7830A Expanded Annunciator through bifurcated contacts.
- Provides terminals for field wiring.
- Q7800B has knockouts provided in back, top and bottom for conduit connections.
- Twenty-two terminals.

APPROVAL BODIES:
- Underwriters Laboratories Inc. component recognized (Q7800A).
- Underwriters Laboratories Inc. listed (Q7800B).
- Canadian Standards Association certified.

DIMENSIONS:
- Q7800A: 4-31/32 in. [126 mm] wide, 4-31/32 in. [126 mm] high, 1-13/32 in. [36 mm] deep.
- Q7800B: 4-31/32 in. [126 mm] wide, 4-31/32 in. [126 mm] high, 2-7/32 in. [56 mm] deep.

REPLACEMENT PART 221779 Electrical Access Slot Covers.

R7847, R7848, R7849, R7886 Flame Signal Amplifiers

Solid state plug-in amplifiers that respond to flame detector inputs to indicate the presence of flame when used with RM78xx and EC78XX SERIES relay modules.

- Flame failure response time of 0.8 or 3 seconds.
- Flame signal strength ranges from 0.0 to 5.0 Vdc.
- Plug-in to 7800 relay module through printed circuit board edge card connector keyed for proper orientation.
- Flame signal test jacks to measure amplifier flame signal voltage.
- Circuit tests flame amplifier during burner operation; 7800 SERIES relay module locks out on amplifier failure.

APPROVAL BODIES:
- Underwriters Laboratories Inc. listed.
- Canadian Standards Association certified.
- Factory Mutual approved.
- Industrial Risks Insurers acceptable.

DIMENSIONS: 3-9/16 in. [91 mm] wide, 3-3/8 in. [85 mm] high, 7/8 in. [23 mm] deep.

WEIGHT: 2.5 oz

OPERATING AMBIENT TEMPERATURE RANGE: – 40 F to +140 F [–40C to +60 C].

OPTIONAL COMPONENTS:
- 123514A Rectification Flame Simulator.
- 203659 Ultraviolet Flame Simulator.

- **Note:** R7849A and C7027, C7035 and C7044 Flame Detectors should be used only on burners that cycle on-off at least once every twenty-four hours. Appliances with burners that remain on for twenty-four hours continuously or longer should use C7061 A Flame Detector with R7861A Amplifier.
- **Circuitry** tests all electronic components in flame detection system (amplifier and detector) 12 times a minute during burner operation and shuts down burner if detection system fails.
- Circuitry tests flame signal amplifier at least 12 times a minute during burner operation and shuts down burner if amplifier fails.
- See instructions for holder.
- **Use only Honeywell Photocell, part number 38316.**
- **For application requiring higher flame signal strength due to leadwire runs of greater than 50 feet or 15 meters.**
- **The 7800 series amplifiers have been modified as of 1/15/98 to provide 0.8 sec/1.0 sec., or 2.0 sec/3.0 sec.**

7800 SERIES Optional Components

S7800A Keyboard Display Module

Provides current status of burner sequence, timing information, hold information and lockout information, as well as selectable or preemptive messages.

- Application flexibility.
- Communication interface capability.
- Dependable long-term operations provided by microcomputer technology.
- First out annunciation and system diagnostics provided by 2 row by 20 column Vacuum Fluorescent Display (VFD).
- Local or remote annunciation of operation and fault information.
- Optional first out expanded annunciation with 24 limit and interlock LEDs enhances keyboard display module information.
- Provides burner controller data.
- Remote reset.
- Report generation.

RM7888A Semi-Automatic Industrial Primary Control

Microprocessor-based integrated burner control for industrial process semi-automatically fired gas, oil, coal, or combination fuels for single and multiple burner applications. Provides level of safety, functional capability and features beyond conventional controls.

- Functions include automatic burner startup sequencing, five user selectable run sequences, four line-voltage sequence control inputs, flame supervision, system status indication, system or self-diagnostics and troubleshooting.
- Requires a relay module, subbase, and amplifier for operation.
- Options include PC interface, keyboard display module, DATA CONTROLBUS MODULE™, remote display mounting, first-out expanded annunciator, and COMBUSTION SYSTEM MANAGER™ software.
- Use with master system control which determines purge timing and confirms air supply and air flow.
- Nonvolatile memory retains history files and sequencing status after power loss.
- Optional remote reset capability.
- Five LEDs provide sequence information.
- Interchangeable plug-in flame amplifiers.
- Local or remote annunciation of operation and fault information.

APPROVAL BODIES:
- Underwriters Laboratories Inc. Component Recognized.
- Factory Mutual Approved.
- Canadian Standards Association certified.

APPROXIMATE DIMENSIONS: 5 in. [127 mm] wide; 5 in. [127 mm] high; 5¼ in. [133 mm] deep with Q7800A Subbase, 6-3/32 in. [155 mm] deep with Q7800B Subbase.

WEIGHT: 1 lb., 10 oz. [757 grams].

OPERATING AMBIENT TEMPERATURE RANGE: -40 F to +140 F [-40 C to +60 C].

ELECTRICAL RATINGS:
- Voltage and Frequency: 120 Vac (+10/-15%), 50 or 60 Hz (±10%).

REQUIRED COMPONENTS:
- Q7800A or B Universal Wiring Subbase.
- R7847, R7848, R7849, or R7886 Plug-in Flame Signal Amplifier.

S7810B MULTI-DROP SWITCH MODULE

APPLICATION
The Honeywell 7800 SERIES is a microprocessor-based integrated burner control for automatically fired gas, oil or combination fuel single-burner applications. The 7800 SERIES is programmed to provide a level of safety, functional capability and features beyond the capacity of conventional controls. Functions provided by the 7800 SERIES include automatic burner sequencing, flame supervision, system status indication, system or self-diagnostics and troubleshooting.

The S7810B Multi-Drop Switch Module supports remote mounting of a Keyboard Display Module, personal computer communications interface for multi-dropped 7800 SERIES subnetworks, and remote reset of a 7800 SERIES Relay Module.

SPECIFICATIONS

Model:
S7810B Multi-Drop Switch Module.

Electrical Ratings:
Voltage and Frequency:
13 Vdc peak full-wave rectified (+20/-15%).
Power Dissipation:
2W maximum.

Terminal Ratings:
Power: 13 Vdc peak full-wave rectified.
Earth ground.
Local ControlBus (1,2,3) and Multi-Drop ControlBus (6,7,8):
5 Vdc at 1 mA maximum.

Electrical Connector (included):
ControlBus: 208727 8-pin electrical connector,

Environmental Ratings:
Ambient Temperature:
Operating: -40°F to +140°F (-40°C to +60°C).
Storage: -40°F to +150°F (-40°C to 66°C).
Humidity:
85% relative humidity continuous, noncondensing.
Vibration:
0.5G environment.

- Multi-dropped communications bus interface.
- Remote reset.
- Ability to remotely mount a Keyboard Display Module.
- SYSNet™ system compatible.

Fig. 1. Mounting dimensions of S7810B Multi-Drop Switch Module in in. (mm).

Weight:
4 ounces.

Accessory:
208727 eight-pin electrical connector.

</tbody>
</table>
S7820A Remote Reset Module

Serves as link between remote reset pushbutton and relay module. Allows RM78xx and EC78xx SERIES relay modules to be reset from a remote location.

- Allows resetting of 7800 SERIES relay module by a remote reset pushbutton up to 1000 feet away.
- Installs directly on the front of 7800 SERIES relay module.

DIMENSIONS: 4-27/32 in. [123 mm] wide, 2-29/32 in. [73 mm] high, 29/32 in. [23 mm] deep.
WEIGHT 3 oz.
OPERATING AMBIENT TEMPERATURE RANGE: –40 F to +140 F [–40 C to +60 C].

S7830A First-Out Expanded Annunciator

Microprocessor-based expanded annunciator to support the RM78xx and EC78XX SERIES relay modules for first-out annunciation, sequencing, system or self-diagnostics and troubleshooting.

- On/Off status of limits and interlocks.
- RS485 connection to 7800 SERIES relay module.
- Used with Q7800A,B subbases; 7800 SERIES relay modules.

APPROVAL BODIES:
- Underwriters Laboratories Inc. listed.
- Canadian Standards Association certified.

- Twenty-six Light Emitting Diodes (LEDs).
- Twenty-two LEDs to annunciate Limits and Interlocks.
- Four LEDs to annunciate Power, Current Status, First-out Status and System Lockout.
- Enhances S7800A Keyboard Display Module sequence hold and lockout messages.

APPICATION

The Q7700A,B Network Interface Unit provides local and remote monitoring and diagnostics of the BCS 7700, 7800 SERIES, Armstrong TrapScan™, Pulsafeeder PULSAtrol™ and QM40XX Data Acquisition devices with an IBM® equivalent personal computer. The Q7700 also provides local and remote configuration and control of BCS 7700, Pulsafeeder PULSAtrol™, or QM40XX Data Acquisition devices.

FEATURES

- Connect up to six BCS 7700 controls, Armstrong TrapScan™ systems, Pulsafeeder PULSAtrol™ systems, up to 900 QM40XX Data Acquisition Modules, and up to 222 multi-dropped 7800 SERIES devices or combinations of the systems.
- Local and remote annunciation of BCS 7700, 7800 SERIES safety shutdowns and Armstrong TrapScan™, Pulsafeeder PULSAtrol™ and QM40XX Data Acquisition Alarms.
- Autodial-out on BCS 7700, 7800 SERIES, Armstrong TrapScan™, Pulsafeeder PULSAtrol™, and QM40XX Data Acquisition Alarms for up to three telephone numbers.
- Personal computer user-friendly, menu driven, Microsoft® Windows™ software-based user interface.
- On-line data logging.
- Modular construction.
- Access controlled with password protection.
- Light Emitting Diode (LED) status interface.
- 19,200 selectable baud personal computer/printer interface.
- 19,200 selectable baud modem interface. Interfaces with Hayes-compatible modems.
- Fault-dating and time-stamping internal software clock.
- Dial-out override for maintenance-induced alarms.
- Dedicated RS-232 external modem port.
- Universal power supply (Q7700B only).
- SYSNet™ compatible.
APPROVAL BODIES:
Underwriters Laboratories Inc. component recognized.
Canadian Standards Association certified.
Factory Mutual approved.
Industrial Risk Insurers acceptable.
Canadian Department of Communications certified.

OPERATING AMBIENT TEMPERATURE RANGE: 32 F to 130 F [0 C to 54 C].
HUMIDITY: 85% relative humidity continuous, noncondensing.

COMPONENTS:
221237 Cover Assembly, Baser Unit.
221240 Cover Assembly, Electrical Enclosure.
202433 Slot Inserts, ControlBus Slots.
200603 ControlBus Module 3-Wire Electrical Connector.
203541 ControlBus Module 5-Wire Electrical Connector.
QS7700A Communications Interface ControlBus Module (BCS7700).
QS7800A Communications Interface ControlBus Module (7800 SERIES).

SPECIFICATIONS

Models:
Q7700A,B Network Interface Unit:
Q7700A1014 Network Interface Unit, 120 Vac only.
Q7700B1004 Network Interface Unit with Universal 100 to 250 Vac power supply.

NOTE: 208670 Power Cord provided with 208289 Universal 100 to 250 Vac Power Supply is equipped with a standard U.S. 120 Vac plug. Adapter plugs for other power systems, if needed, can be obtained locally.

Electrical Ratings:
Voltage and Frequency:
Q7700A: 120 Vac (+10%/-15%), 50/60 Hz.
Q7700B: 100 to 250 Vac, 50/60 Hz.

Universal Power Supply (Q7700B only):
Rated Voltage: 100 to 250 Vac, 50/60 Hz.
Rated Input: 0.7A to 0.3A.
Secondary Voltages: +5V, +12V, -12V.
Secondary Current: 4.0A, 1.0A, 0.6A maximum.

Electrical Connectors:
RS-232C port, 25 D pin connector for local communications.
RS-232 port, 9 D pin connector for remote communications.

Environmental Ratings:
Ambient Temperature:
Operating: 32°F to 130°F (0°C to 54°C).
Storage: -30°F to +150°F (-34°C to 66°C).
Humidity:
Operating, 85 percent relative humidity, continuous, noncondensing.
Vibration:
Continuous 0.5G.
Enclosure:
NEMA 1.

Dimensions:
See Fig. 1.

Fig. 1. Network Interface unit dimensions in in. (mm).
QS7800A/QS7850A Communications Interface ControlBus Module

 Allows remote monitoring and diagnostics of the RM78xx and EC78xx SERIES relay modules with an IBM® compatible personal computer.

- Provides local and remote annunciation of 7800 SERIES faults.
- QS7850A provides open protocol communications with third party systems.
- Provides user interface to personal computer.
- Modular construction, NEMA #1 rated enclosure.

APPROVAL BODIES:
- Underwriters Laboratories Inc. component recognized, File No. MP268, Guide No. MCCZ2.
- Canadian Standards Association certified, LR80141.
- FCC Registration Number HS92SJ-1073-D-E.
- Canadian Department of Communications certified.

ZM7850A Combustion System Manager™ Software

The ZM7850 is support software for connecting BCS 7700, RM78xx, and EC78xx SERIES controls with an IBM® or equivalent personal computer running Microsoft Windows™ 3.0 or greater. It is a graphical, mouse-driven software package that is easy to use and understand. It provides data logging, remote interrogation, remote set point adjustment of non-safety parameters (BCS 7700 only), history, real-time graphics, and control point trending.

**A7800A Tester**

Provides quick operational check of the 7800 SERIES System components.

- Function switches and selectors simulate interlocks and control functions that allow 7800 SERIES devices to operate through sequences.
- Indicator lamps represent outputs as activated.

OPERATING AMBIENT TEMPERATURE RANGE: 0 F to 120 F (–18 C to 49 C).

ELECTRICAL RATING: 120 Vac, 50/60 Hz.

REQUIRED COMPONENTS:
- 203579A Configuration plug for RM7800/RM7840.
- 203579B Configuration plug for RM7838A.
- 203579C Configuration plug for RM7838B.
- 203579D Configuration plug for RM7885.
- 203579E Configuration plug for RM7890.
- 203579F Configuration plug for RM7895.
- 203579G Configuration plug for RM7823.

OPTIONAL COMPONENTS:
- 123514A Rectification Flame Simulator.
- 203659 Ultraviolet Flame Simulator.
- W136A Test Meter.

REPLACEMENT PARTS: 192128 Panel fuse, 1.0A.

EC7800 SERIES EC7810A, EC7820A

Microprocessor-based integrated primary burner control for automatically fired gas, oil, or combination fuel single atmospheric (EC7810A) or atmospheric with fan (EC7820A) burner applications.

EC7810A, EC7820A

- Functions include automatic burner sequencing, flame supervision, system status indication, system or self-diagnostics and troubleshooting.
- Five LED's provide sequence information.
- Access for external electrical voltage checks.
- Interchangeable plug-in flame amplifier.
- Non-volatile memory retains history files and lockout status after loss of power.
- Spark Blind during pre-ignition.
- Ignition attempts: 1 or 5. Selectable by model numbers.

APPROVALS: This product complies with the following European directives:
- Gas Appliance Directive (90/269/EEG).
- EMC Directive (89/336/EEG).
- GASTEC (CE-63AP307011).
- CE Mark approval EN298 “Automatic gas burner systems for gas burners and gas burning appliances with or without fans”.
- For oil applications, a German TÜV approval, per EN230.

AUSTRALIAN APPROVAL: Australian Gas Association Code AG210 - Electronic flame safeguards and detectors - Certification number 5097 dated June, 1994. EC7810 and EC7820 Class 2C and lower applications.

MOUNTING: Q7800A for panel mount. To meet EN60730, the Relay Module has to be mounted in a secured panel which meets IP40 class of protection.

DIMENSIONS: 5 in (127mm) wide; 5 in. (127mm) high; 5 ¼ in. (133mm) deep with Q7800A1005 subbase.

WEIGHT:
- Relay Module: 730 grams unpacked.
- Keyboard Display Module: 113 grams unpacked.

OPERATING AMBIENT TEMPERATURE RANGE:
-40°C to +60°C (-40°F to +140°F)

ELECTRICAL RATING: Voltage and Frequency: 220-240 Vac (+10/-15%), 50/60 Hz (±10%).

REQUIRED COMPONENTS:
- Q7800A1005 Universal Wiring Subbase.
- R7847, R7849, R7861, R7886 Flame Signal Amplifier.
- ST7800A Plug-in Purge Timer Card.

OPTIONAL COMPONENTS:
- S7820 Remote Reset Module.

REPLACEMENT PARTS:
- S7800A, B Keyboard display module: See page H-60.
- S7810A1009 DATA CONTROLBUS MODULE™.
- 203541 5-Wire Electrical Connector to S7800A.
- 221729 Dust Cover.
- 203765 Remote Display Mounting Bracket.
- 221818A 1.5 Meter Extension Cable Assembly to Remote Mount Keyboard Assembly.
- 204718A NEMA4 Cover Assembly for S7800A.
- 204718C NEMA4 Cover Assembly with Reset for S7800A.

EC7800 SERIES EC7830A, EC7850A

Microprocessor-based integrated burner control for automatically fired gas, oil, or combination fuel full modulation (EC7850A) or ON/OFF (EC7830A) power burner applications.

- Functions include automatic burner sequencing, flame supervision, system status indication, system or self-diagnostics and troubleshooting.
- Access for external electrical voltage checks.
- Five LED's provide sequence information.
- Five function Run/Test switch.
- Interchangeable plug-in flame amplifier.
- Non-volatile memory retains history files and lockout status after loss of power.
- Compatible with existing Honeywell flame detectors.
- Spark Blind during pre-ignition.

APPROVALS: This product complies with the following European directives:
- Gas Appliance Directive (90/269/EEG).
- EMC Directive (89/336/EEG).
- GASTEC (CE-63AP307011).
- CE Mark approval EN298 “Automatic gas burner systems for gas burners and gas burning appliances with or without fans”.
- For oil applications, a German TUV approval, per EN230.

AUSTRALIAN APPROVALS: Australian Gas Association Code AG210 - Electronic flame safeguards and detectors - Certification number 5097 dated June, 1994. EC7830 and EC7850 Class 1A or 2A applications.

MOUNTING: Q7800A1005 for panel mount. To meet EN60730, the Relay Module has to be mounted in a secured panel which meets IP40 class of protection.

DIMENSIONS: 5 in (127mm) wide; 5 in. (127mm) high; 5 1/4 in. (133mm) deep with Q7800A1005 subbase.

WEIGHT:
- Relay Module: 730 grams unpacked.
- Keyboard Display Module: 113 grams unpacked.

OPERATING AMBIENT TEMPERATURE RANGE:
- -40°C to +60°C (-40°F to +140°F)

ELECTRICAL RATING: Voltage and Frequency:
- 220-240 Vac (+10/-15%), 50/60 Hz (±10%).

REQUIRED COMPONENTS:
- Q7800A1005 Universal Wiring Subbase.
- R7847, R7849, R7861, R7886 Flame Signal Amplifier.
- ST7800A Plug-in Purge Timer Card.

OPTIONAL COMPONENTS:
- S7820 Remote Reset Module.

REPLACEMENT PARTS:
- S7800A, B Keyboard display module: See page H-60.
- S7810A1009 DATA CONTROLBUS MODULE™.
- 203541 5-Wire Electrical Connector to S7800A.
- 221729 Dust Cover.
- 203765 Remote Display Mounting Bracket.
- 221818A 1.5 Meter Extension Cable Assembly to Remote Mount Keyboard Assembly.
- 204718A NEMA4 Cover Assembly for S7800A.
- 204718C NEMA4 Cover Assembly with Reset for S7800A.
